

National Association of SARA Title III Program Officials

Concerned with the Emergency Planning and Community Right-to-Know Act

November 8, 2007

The Department of Homeland Security has adopted 6 CFR Part 27, a new regulation mandated by Congress. The regulation is intended to fill a security gap in our country's anti-terrorism efforts by identifying and improving the security of chemicals that are potentially at a high level of risk for release, theft, or sabotage.

LEPCs and SERCs should alert EPCRA & RMP reporting facilities about these requirements. No reports are due to the LEPCs and SERCs under these requirements; however, given the potential for security requirements to have an impact on facility access for emergency responders and on emergency plans, it is critical for local planners, responders and facilities to communicate in order for a facility to satisfy the regulatory requirements.

In order to aid LEPCs, SERCs and facilities in understanding these new requirements we have prepared some short-hand aids. Following this cover page is a key issue comparison between EPCRA, RMP and the CFATS regulation. As requirements may change the user is counseled to look for updated information.

Following the side-by-side comparison we have edited the EPA "List of Lists" to add the proposed Appendix A list of chemicals and thresholds from the CFATS program. This list may change and we will update these materials when that happens.

The initial requirement for a facility with an Appendix A chemical over the threshold is to submit a Top-Screen. The CSAT Top-Screen is a questionnaire regarding the chemicals manufactured, processed, used, stored at or distributed by each facility. Based on the results of the CSAT Top-Screen facilities will be placed in one of four risk based tiers. DHS will require facilities preliminarily placed in Tiers 1-3 to complete a CSAT Security Vulnerability Assessment and develop CSAT Site Security Plan. The CSAT Top-Screen questionnaire, Security Vulnerability Assessment tool, and Site Security Plan template are online tools that DHS will require all regulated facilities to use.

The Top-Screen must be completed online within 60 calendar days of the effective date of the final Appendix A Chemicals of Interest list. DHS has finalized Appendix A and it expects the 60 day clock to begin to run on or about November 16th. Failure to complete a CSAT Top-Screen within the timeframe provided may result in civil penalties, a Department of Homeland Security audit and inspection, or an order to cease operations.

Facilities should go to www.DHS.gov/chemicalsecurity and follow the registration instructions to access the CSAT. Once DHS validates a facility's registration, DHS will notify the facility about how to access the Top-Screen and other CSAT tools. A list of CSAT Top-Screen questions and user instructions are also available online at http://www.dhs.gov/xprevprot/programs/gc_1169501486197.shtm.

A full text version of the Chemical Facility Anti-Terrorism Standards Interim Final Rule (6 CFR Part 27) and Appendix A: DHS Chemicals of Interest are available online at <http://www.dhs.gov/chemicalsecurity>

	Department of Homeland Security	EPCRA (SARA Title III)	RMP (Clean Air Act)
Facilities Regulated	<p>Overview: Facilities are regulated based on their classification as “high risk facilities,” which <i>may</i> be determined by the presence of threshold quantities of certain chemicals, within the broad categories of: toxics, explosives, flammables, CW/CWP, sabotage/contamination chemicals, mission critical chemicals, and economically critical chemicals.</p> <p>Definition: “Chemical Facility or facility shall mean any establishment that possesses or plans to possess, at any relevant point in time, a <i>quantity of a chemical substance</i> determined by the Secretary to be potentially dangerous or that meets other <i>risk-related criteria</i> identified by the Department. As used herein, the term chemical facility or facility shall also refer to the owner or operator of the chemical facility. Where multiple owners and/or operators function within a common infrastructure or within a single fenced area, the Assistant Secretary may determine that such owners and/or operators constitute a single chemical facility or multiple chemical facilities depending on the circumstances.” 6 C.F.R. § 27.105 (2007) (emphasis added).</p>	<p>Overview: Generally, the requirements for emergency planning and reporting apply to any facility that has quantities of chemicals on the list of lists that are above threshold levels.</p> <p>The requirements for emergency release notification apply to any facility where a hazardous chemical is used, produced or stored, or where there is a release of a hazardous chemical or CERCLA substance. 40 C.F.R. § 355.40 (2007) (noting exceptions).</p> <p>Definition: Facility means all buildings, equipment, structure, and other stationary items that are located on a single site or on contiguous or adjacent sites and which are owned or operated by the same person (or by any person which controls, is controlled by, or under common control with, such person). Facility shall include manmade structures in which chemicals are purposefully placed or removed through human means such that it functions as a containment structure for human use. For purposes of emergency release notification, the term includes motor vehicles, rolling stock, and aircraft. 40 C.F.R. § 355.20 (2007).</p>	<p>Note: The Clean Air Act uses the term “stationary source” rather than facility in its statutory provisions. Thus, these provisions apply to an owner or operator of a <u>stationary source</u> that has more than a threshold quantity of a regulated substance in a process. 40 C.F.R. §68.10 (2007).</p> <p>Definition: Stationary source means any buildings, structures, equipment, installations, or substance emitting stationary activities which belong to the same industrial group, which are located on one or more contiguous properties, which are under the control of the same person (or persons under common control), and from which an accidental release may occur. The term stationary source does not apply to transportation, including storage incident to transportation, of any regulated substance or any other extremely hazardous substance under the provisions of this part. A stationary source includes transportation containers used for storage not incident to transportation and transportation containers connected to equipment at a stationary source for loading or unloading. Transportation includes, but is not limited to, transportation subject to oversight or</p>

	Department of Homeland Security	EPCRA (SARA Title III)	RMP (Clean Air Act)
	<p>For exceptions to facilities regulated because of coverage by other laws, <u>see</u> 6 C.F.R. § 27.110 (2006).</p> <p>Designation: The Assistant Secretary has the discretion to designate a facility as “high risk” at any time based on the information available, or may request information through publication in the Federal Register or through direct contact with a facility. <u>See</u> 6 C.F.R. § 27.200 (2007).</p> <p>Note: Any facility that does not respond to a request for information may be presumed a high risk facility.</p> <p>“ACG” – A Commercial Grade “APA” – A Placarded Amount “STQ” – Screening Threshold Quantity</p>		<p>regulation under 49 CFR parts 192, 193, or 195, or a state natural gas or hazardous liquid program for which the state has in effect a certification to DOT under 49 U.S.C. section 60105. A stationary source does not include naturally occurring hydrocarbon reservoirs. Properties shall not be considered contiguous solely because of a railroad or pipeline right-of-way. <u>See</u> 40 C.F.R. §§ 68.3-10 (2007).</p>
Chemical Threshold Quantities	<u>See</u> Appendix A (added to Title III Consolidated List of Lists)	<u>See</u> Title III Consolidated List of Lists	<u>See</u> Title III Consolidated List of Lists
Calculation of Thresholds	<p>Two types of calculations will be made:</p> <p>(1) The total onsite quantity and distance of concern; and</p> <p>(2) The quantity in the Area of Highest Quantity and distance of</p>	<p>Calculation of threshold planning quantities for solids and mixtures:</p> <p>(1) If a container or storage vessel holds a mixture or solution of an extremely hazardous substance, then the concentration of extremely hazardous substance, in weight percent (greater than</p>	<p>A threshold quantity of a regulated substance listed in § 68.130 is present at a stationary source if the total quantity of the regulated substance contained <i>in a process</i> exceeds the threshold. 40 C.F.R. § 68.115 (2007) (noting exceptions).</p>

	Department of Homeland Security	EPCRA (SARA Title III)	RMP (Clean Air Act)
	<p>concern</p> <p>See Top Screen Manual, <i>available at http://www.dhs.gov/xlibrary/assets/chemsec_csattopscreenusersmanual.pdf</i>. The Manual is currently offline and being updated.</p> <p>The screening threshold quantity (STQ) for each chemical is assigned by the security issue associated with the chemical. There are four main security issues: (1) release (including toxic, flammable, and explosive); theft and diversion (including chemical weapons and chemical weapon precursors, weapons of mass effect, and explosives and improvised explosive device precursors); (3) sabotage and contamination; and (4) critical to government mission and national economy. Section 27.105. Chemicals of interest are calculated according to their security issue category. See Section 27.203 and below.</p> <p>In calculating whether a facility possesses a chemical of interest that meets the STQ for any security issue, the facility need not include any chemical of interest: (1) used as a</p>	<p>1%), shall be multiplied by the mass (in pounds) in the vessel to determine the actual quantity of extremely hazardous substance therein.</p> <p>(2)(i) Extremely hazardous substances that are solids are subject to either of two threshold planning quantities as shown on Appendices A and B (i.e., 500/611,000 pounds). The lower quantity applies only if the solid exists in powdered form and has a particle size less than 100 microns; or is handled in solution or in molten form; or meets the criteria for a National Fire Protection Association (NFPA) rating of 2, 3 or 4 for reactivity. If the solid does not meet any of these criteria, it is subject to the upper (10,000 pound) threshold planning quantity as shown in Appendices A and B.</p> <p>(ii) The 100 micron level may be determined by multiplying the weight percent of solid with a particle size less than 100 microns in a particular container by the quantity of solid in the container.</p> <p>(iii) The amount of solid in solution may be determined by multiplying the weight percent of solid in the solution in a particular container by the quantity of solution in the container.</p>	

	Department of Homeland Security	EPCRA (SARA Title III)	RMP (Clean Air Act)
	<p>structural component; (2) used as products for routine janitorial maintenance; (3) contained in food, drugs, cosmetics, or other personal items used by employees; (4) in process water or non-contract cooling water as drawn from environment or municipal sources; (5) in air either as compressed air or as part of combustion; (6) contained in articles, as defined in 40 CFR § 68.3; (7) in solid waste regulated under RCRA; (8) in naturally occurring hydrocarbon mixtures prior to entry of the mixture into a natural gas processing plant or a petroleum refining process unit. Section 27.203(a).</p> <p>A facility must include chemicals with a release-chemical designation toward the STQ found in: (i) a vessel, underground storage facility, or magazine; (ii) transportation containers; (iii) process intermediates, by-products, incidental materials; (iv) natural gas or liquefied natural gas stored in peak shaving facilities; and (v) fuel stored in aboveground tank farms. Section 27.203(b)(1).</p> <p>A facility need not include release-chemicals that a facility manufactures</p>	<p>(iv) The amount of solid in molten form must be multiplied by 0.3 to determine whether the lower threshold planning quantity is met. <u>See 40 C.F.R. § 355.40 (2007).</u></p>	

	Department of Homeland Security	EPCRA (SARA Title III)	RMP (Clean Air Act)
	<p>processes or uses in a laboratory unless the use/process is pilot plant scale operations or activities conducted outside the laboratory. Section 27.203(b)(2).</p> <p>A facility also need not include propane in tanks of 10,000 pounds or less. Section 27.203(b)(3).</p> <p>A facility must only include chemicals with a theft/diversion chemical designation toward the STQ found in transportation packaging. Section 27.203(c).</p> <p>A facility meets the STQ for a chemical with a sabotage/contamination designation if the facility ships the chemical and is required to placard the shipment pursuant to subpart F of 49 CFR Part 172. Section 27.203(d).</p>		
Treatment of Mixtures	<p>See § 27.204 in the DHS Appendix A Final Rule.</p> <p>A facility must count the amount of release-toxic chemicals of interest toward the STQ if the chemical is present at a concentration equal to or greater than 1% by weight of the</p>	<p>Mixture is defined as a heterogeneous association of substances where the various individual substances retain their identities and can usually be separated by mechanical means. Includes solutions or compounds but does not include alloys or amalgams. 40 C.F.R. 355.20 (2007).</p>	<p>Mixtures are regulated by the CAA based on guidelines for two categories of hazardous materials:</p> <p>(1) Toxic Substances (2) Flammable Substances</p> <p>For these categories, the following</p>

	Department of Homeland Security	EPCRA (SARA Title III)	RMP (Clean Air Act)
	<p>mixture unless the facility can demonstrate that the partial pressure of the regulated substance is less than 10 mm Hg.</p> <p>A facility must count the entire amount of a mixture containing a release-flammable chemical of interest at a concentration equal to or greater than 1% by weight of a mixture having a NFPA flammability hazard rating of 4.</p> <p>A facility must count the total quantity of all commercial grades of release-explosive chemicals of interest toward the STQ unless a specific minimum concentration is assigned, in which case the facility must count the total quantity of all commercial grades of the chemical at the specified minimum concentration.</p> <p>A facility must count toward the STQ the entire amount of a mixture containing a non-CUM 100g theft/diversion-CWC/CWP chemical of interest present in a mixture at or above the minimum concentration amount listed.</p> <p>A facility must count toward the STQ</p>	<p>An owner or operator may meet the requirements of EPCRA § 311 or EPCRA § 312 with respect to a hazardous chemical which is a mixture by doing one of the following:</p> <p>(A) Submitting a material safety data sheet for, or identifying on a list, each element or compound in the mixture which is a hazardous chemical. If more than one mixture has the same element or compound, only one material safety data sheet, or one listing, of the element or compound is necessary.</p> <p>(B) Submitting a material safety data sheet for, or identifying on a list, the mixture itself.</p>	<p>exemptions/calculations apply:</p> <p><u>Toxic Substances</u></p> <p>To determine whether a mixture that is in a process meets the threshold quantity, the EPA divides toxic substances into two categories. First, the Act, as well as guidance on the Act, lists certain chemicals in solutions or mixtures for which a specific cut-off is stated. Quantities of Hazardous Substances below that amount need not be used in the threshold quantity calculation. Second, any other regulated toxic substances that are part of solutions or mixtures must meet the one-percent de-minimis requirement unless the facility can show that the partial pressure of the substance in the solution or mixture is less than 10 mm Hg. In that case, the substance should not be included in the threshold calculation.</p> <p><u>See List of Regulated Substances and Thresholds for Accidental Release Prevention; Requirements for Petitions Under Section 112(r) of the Clean Air Act, 25 available at http://daq.state.nc.us/112r/files/40cfr68(9&68)_01141994.pdf.</u></p> <p><u>Flammable Substances</u></p>

	Department of Homeland Security	EPCRA (SARA Title III)	RMP (Clean Air Act)
	<p>the entire amount of a mixture containing a theft/diversion-WME chemical of interest present at or above the minimum amount listed.</p> <p>A facility must count the total quantity of all commercial grades of a theft/diversion-EXP/IEDP chemical of interest toward the STQ unless a specific minimum concentration is assigned, in which case the facility must count the total quantity of all commercial grades of the chemical at the specified minimum concentration.</p> <p>A facility must count toward the STQ the total quantity of all commercial grades of a sabotage/contamination chemical of interest.</p>		<p>A mixture should only be considered as meeting the threshold if it meets the criteria for an NFPA flammability rating of 4; boiling point and flash point shall be defined and determined in accordance with NFPA 30, Flammable and Combustible Liquids Code, National Fire Protection Association. <u>See</u> 49 C.F.R. 68.115(b)(2).</p>
Emergency Planning/Reporting	<p>Each regulated facility must create a “site security plan” that addresses any identified risk factors present. 6 C.F.R. § 27.225. The plan should meet each of the risk based performance standards identified in 6 C.F.R. 27.230 (2007).</p> <p>Additionally, each regulated facility must engage in, and submit records</p>	<p><u>Reporting:</u> EPCRA has several different reporting mechanisms within its provisions:</p> <p>(1) Pursuant to § 302, facilities with a regulated chemical in excess of the threshold quantity, a one-time notification to the SERC that the facility is subject to EPCRA. Thereafter, Generally, any facility that has any of the EHS listed chemicals at or above its threshold planning quantity must notify the SERC</p>	<p>If a facility uses chemicals in a process, and the amount of chemicals used is equal to or higher than the threshold level, a Risk Management Plan (“RMP”) should be prepared.</p> <p><u>RMP:</u> The owner or operator of a stationary source with processes subject to Program 2 or Program 3 shall develop a management system to oversee the implementation of the RMP elements. 40</p>

	Department of Homeland Security	EPCRA (SARA Title III)	RMP (Clean Air Act)
	<p>of: training; drills and exercises; incidents and breaches of security; maintenance, calibration and testing of security equipment; security threats; audits; and letters of authorization and approval. Additionally, any Top-Screens, Security Vulnerability assessments, Site Security Plans, and correspondence with the Department for the last six years must be recorded. 6 C.F.R. 27.255 (2007).</p>	<p>and LEPC within 60 days after they first receive a shipment or produce the substance on site. EPCRA § 302 (2)(c).</p> <p>(2) Pursuant to § 304, a notification each time a release occurs. Releases requiring notification under § 304(b) include substances regulated under CERLCA; substances not regulated by CERCLA if is not a federally permitted release as defined in section 101(10) of CERCLA, if the release is in an amount in excess of a quantity which the Administrator has determined (by regulation) requires notice, and occurs in a manner which would require notification under section 103(a) of CERCLA; and for some substances that are not regulated by EPCRA § 301, but are regulated by CERCLA § 102-3.</p> <p>Notification should include the following information: The chemical name; an indication of whether the substance is extremely hazardous; an estimate of the quantity released into the environment; the time and duration of the release; whether the release occurred into air, water, and/or land; any known or anticipated acute or chronic health risks associated with the emergency, and where necessary advice regarding medical</p>	<p>C.F.R. § 68.15 (2007); Management System Guidance, <i>available at</i> http://yosemite1.epa.gov/oswer/ceppoweb.nsf/vwResourcesByFilename/Chap-05-final.pdf/\$File/Chap-05-final.pdf.</p> <p>For guidance on preparing an RMP, see Risk Management Program Guidance, <i>available at</i> http://yosemite1.epa.gov/oswer/ceppoweb.nsf/vwResourcesByFilename/Chap-09-final.pdf/\$File/Chap-09-final.pdf.</p> <p><u>Elements:</u> The RMP shall contain an executive summary which includes: the accidental release prevention and emergency response policies at the stationary source; the stationary source and regulated substances handled; the general accidental release prevention program and chemical-specific prevention steps; the five-year accident history; the emergency response program; and planned changes to improve safety. <u>See</u> 40 C.F.R. § 68.155 (2007).</p> <p>The RMP shall contain a registration document, prepared according to 40 C.F.R. § 68.160 (2007).</p>

	Department of Homeland Security	EPCRA (SARA Title III)	RMP (Clean Air Act)
		<p>attention for exposed individuals; proper precautions, such as evacuation or sheltering in place; and, name and telephone number of contact person. <u>See</u> EPCRA § 304. A written follow-up notice should be sent as soon as possible. EPCRA § 304 (c).</p> <p>Sections 311-12 deal with facilities that are regulated by Occupational Safety and Health Act's ("OSHA") Hazard Communication Standard. OSHA requires that employers keep material safety data sheets ("MSDS") for approximately 500,000 chemicals. Generally, the minimum threshold levels for reporting hazardous chemical this section is 10,000 pounds, with a lower threshold for extremely hazardous chemicals. Gasoline and diesel fuel are exempt.</p> <p>Section 311 requires that employers who have MSDS chemicals above certain levels at their facilities submit either copies of their MSDS, or a list of their MSDSs to SERC, LEPC, and the local fire department. A list of MSDS chemicals must include: immediate/delayed health hazards, fire hazards, sudden release of pressure hazards, and/or reactive hazards.</p>	<p>The RMO shall contain an Offsite Consequence Analysis ("OCA") (also referred to as RMP Comp) for each Program 1 process, and for Program 2 and 3 processes, one OCA to represent all regulated flammable substances held above the threshold quantities. In addition, the RMP should include one alternative release scenario for each toxic substance regulated by Program 2 and 3, and one alternative release scenario for each regulated flammable substance in Program 2 and 3 processes. Each OCA has two parts: the worst case scenario, and an alternative scenario.</p> <p>The following data shall be included in the OCA: chemical name; percentage weight of the chemical in a liquid mixture (toxics only); physical state (toxics only); basis of results (give model name if used); scenario (explosion, fire, toxic gas release, or liquid spill and evaporation); quantity released in pounds; release rate; release duration; wind speed and atmospheric stability class (toxics only); topography (toxics only); distance to endpoint; public and environmental receptors within the distance; passive mitigation considered; and active mitigation considered (alternative releases only). <u>See</u> 40 C.F.R. § 68.165</p>

	Department of Homeland Security	EPCRA (SARA Title III)	RMP (Clean Air Act)
		<p>Facilities covered by § 312 must also submit an annual emergency and hazardous chemical inventory form to the SERC, LEPC, and fire department. This report is given as either a Tier I or Tier II report, depending on which is required by state law.</p> <p>Generally, a Tier I report contains: An estimate (in ranges) of the maximum amount of chemicals present for each category at the facility at any time during the preceding calendar year; an estimate (in ranges) of the average daily amount of chemicals in each category; and the general location of the hazardous chemicals in each category. A Tier II Report contains the same information, but also requires the chemical/common name as required on the MSDS.</p> <p>Although a facility may not otherwise qualify for Tier I/Tier II reporting, an LEPC may request Tier II information regardless of the amount of MSDS chemical present. § 312(e)(3)(c).</p>	<p>(2007); RMP Guidance for Offsite Consequence Analysis, <i>available at</i> http://yosemite1.epa.gov/oswer/ceppoweb.nsf/vwResourcesByFilename/oca-all.PDF/\$File/oca-all.PDF.</p> <p>For Program 2 processes, the RMP must also contain a prevention plan pursuant to 40 C.F.R. § 68.170 (2007). For Program 3 processes, the RMP must also contain a prevention plan pursuant to 40 C.F.R. § 68.175 (2007).</p> <p>The RMP shall contain a 5 year history of accidents covered in 40 C.F.R. § 68.42(a)-(b) (2007).</p> <p>The RMP shall contain information about emergency response programs pursuant to 40 C.F.R. § 68.180 (2007).</p> <p>The RMP shall contain a certification of accuracy pursuant to 40 C.F.R. § 68.185 (2007).</p>

THE LIST BELOW CONTAINS RCRA WASTE STREAMS AND UNLISTED HAZARDOUS WASTES. THE DESCRIPTIONS OF THE WASTE STREAMS HAVE BEEN TRUNCATED. THE FOLLOWING LIST SHOULD BE USED FOR REFERENCE ONLY. COMPLIANCE INFORMATION CAN BE FOUND IN 40 CFR PART 302 AND TABLE 302.4

The following spent halogenated solvents used in degreasing:

(a) Tetrachloroethylene (CAS No. 127-18-4, RCRA Waste No. U210)						10		F001
(b) Trichloroethylene (CAS No. 79-01-6, RCRA Waste No. U228)						100		
(c) Methylene chloride (CAS No. 75-09-2, RCRA Waste No. U080)						100		
(d) 1,1,1-Trichloroethane (CAS No. 71-55-6, RCRA Waste No. U226)						1,000		
(e) Carbon tetrachloride (CAS No. 56-23-5, RCRA Waste No. U211)						1,000		
(f) Chlorinated fluorocarbons						10		
The following spent halogenated solvents:						5,000		
(a) Tetrachloroethylene (CAS No. 127-18-4, RCRA Waste No. U210)						10		F002
(b) Methylene chloride (CAS No. 75-09-2, RCRA Waste No. U080)						100		
(c) Trichloroethylene (CAS No. 79-01-6, RCRA Waste No. U228)						1,000		
(d) 1,1,1-Trichloroethane (CAS No. 71-55-6, RCRA Waste No. U226)						100		
(e) Chlorobenzene (CAS No. 108-90-7, RCRA Waste No. U037)						1,000		
(f) 1,1,2-Trichloro-1,2,2-trifluoroethane (CAS No. 76-13-1)						100		
(g) o-Dichlorobenzene (CAS No. 95-50-1, RCRA Waste No. U070)						5,000		
(h) Trichlorofluoromethane (CAS No. 75-69-4, RCRA Waste No. U121)						100		
(i) 1,1,2-Trichloroethane (CAS No. 79-00-5, RCRA Waste No. U227)						5,000		
The following spent non-halogenated solvents and still bottom from recovery:						100		
(a) Xylene (CAS No. 1330-20-7, RCRA Waste No. U239)						100		F003
(b) Acetone (CAS No. 67-64-1, RCRA Waste No. U002)						1,000		
(c) Ethyl acetate (CAS No. 141-78-6, RCRA Waste No. U112)						5,000		
(d) Ethylbenzene (CAS No. 100-41-4)						5,000		
(e) Ethyl ether (CAS No. 60-29-7, RCRA Waste No. U117)						1,000		
(f) Methyl isobutyl ketone (CAS No. 108-10-1, RCRA Waste No. U161)						100		
(g) n-Butyl alcohol (CAS No. 71-36-3, RCRA Waste No. U031)						5,000		
(h) Cyclohexanone (CAS No. 108-94-1, RCRA Waste No. U057)						5,000		
(i) Methanol (CAS No. 67-56-1, RCRA Waste No. U154)						5,000		
The following spent non-halogenated solvents and still bottom from recovery:						5,000		
(a) Cresols/cresylic acid (CAS No. 1319-77-3, RCRA Waste No. U052)						100		F004
(b) Nitrobenzene (CAS No. 98-95-3, RCRA Waste No. U169)						100		
The following spent non-halogenated solvents and still bottom from recovery:						1,000		
(a) Toluene (CAS No. 108-88-3, RCRA Waste No. U220)						100		F005
(b) Methyl ethyl ketone (CAS No. 78-93-3, RCRA Waste No. U159)						1,000		
(c) Carbon disulfide (CAS No. 75-15-0, RCRA Waste No. P022)						5,000		
(d) Isobutanol (CAS No. 78-83-1, RCRA Waste No. U140)						100		
(e) Pyridine (CAS No. 110-86-1, RCRA Waste No. U196)						5,000		
Wastewater treatment sludges from electroplating operations (w/some exceptions)						1,000		
Spent cyanide plating bath solns. from electroplating						10		F006
Plating bath residues from electroplating where cyanides are used						10		F007
Spent stripping/cleaning bath solns. from electroplating where cyanides are used						10		F008

NAME	NAMEINDEX	CAS/ 313 Category Codes	DHS STQ (in pounds unless otherwise noted)	Section 302 (EHS) TPO	Section 304 EHS RQ	CERCLA RQ	Section 313 RCRACODE	CAA 112(r) TQ
Quenching bath residues from metal heat treating where cyanides are used						10	F009	
Spent cyanide soln. from salt bath pot cleaning from metal heat treating						10	F010	
Quenching wastewater sludges from metal heat treating where cyanides are used						10	F011	
Wastewater treatment sludges from chemical conversion aluminum coating						10	F012	
Wastes from prod. or use of tri/tetrachlorophenol or derivative intermediates						10	F019	
Wastes from prod. or use of pentachlorophenol or intermediates for derivatives						1	F020	
Wastes from use of tetra/penta/hexachlorobenzenes under alkaline conditions						1	F021	
Wastes from mat. prod. on equip. previously used for tri/tetrachlorophenol						1	F022	
Wastes from production of chlorinated aliphatic hydrocarbons (C1-C5)						1	F023	
Lights ends, filters from prod. of chlorinated aliphatic hydrocarbons (C1-C5)						1	F024	
Waste from equipment previously used to prod. tetra/penta/hexachlorobenzenes						1	F025	
Discarded formulations containing tri/tetra/pentachlorophenols or derivatives						1	F026	
Residues from incineration of soil contaminated w/ F020,F021,F022,F023,F026,F027						1	F027	
Wastewaters, process residuals from wood preserving using chlorophenolic solns.						1	F028	
Wastewaters, process residuals from wood preserving using creosote formulations						1	F032	
Wastewaters, process residuals from wood preserving using arsenic or chromium						1	F034	
Petroleum refinery primary oil/water/solids separation sludge						1	F035	
Petroleum refinery secondary (emulsified) oil/water/solids separation sludge						1	F037	
Multisource leachate						1	F038	
Wastewater treatment sludge from creosote/pentachlorophenol wood preserving						1	F039	
Wastewater treatment sludge from prod. of chrome yellow and orange pigments						1	K001	
Wastewater treatment sludge from prod. of molybdate orange pigments						10	K002	
Wastewater treatment sludge from prod. of zinc yellow pigments						10	K003	
Wastewater treatment sludge from prod. of chrome green pigments						10	K004	
Wastewater treatment sludge from prod. of chrome oxide green pigments						10	K005	
Wastewater treatment sludge from prod. of iron blue pigments						10	K006	
Oven residue from prod. of chrome oxide green pigments						10	K007	
Dist. bottoms from prod. of acetaldehyde from ethylene						10	K008	
Dist. side cuts from prod. of acetaldehyde from ethylene						10	K009	
Bottom stream from wastewater stripper in acrylonitrile prod.						10	K010	
Bottom stream from acetonitrile column in acrylonitrile prod.						10	K011	
Bottoms from acetonitrile purification column in acrylonitrile prod.						10	K013	
Still bottoms from the dist. of benzyl chloride						5,000	K014	
Heavy ends or dist. residues from prod. of carbon tetrachloride						10	K015	
Heavy ends from the purification column in epichlorohydrin prod.						1	K016	
Heavy ends from the fractionation column in ethyl chloride prod.						10	K017	
Heavy ends from the dist. of ethylene dichloride during its prod.						1	K018	
Heavy ends from the dist. of vinyl chloride during prod. of the monomer						1	K019	
Aqueous spent antimony catalyst waste from fluoromethanes prod.						1	K020	
Dist. bottom tars from prod. of phenol/acetone from cumene						10	K021	
Dist. light ends from prod. of phthalic anhydride from naphthalene						1	K022	
Dist. bottoms from prod. of phthalic anhydride from naphthalene						5,000	K023	
Dist. bottoms from prod. of nitrobenzene by nitration of benzene						5,000	K024	
Stripping still tails from the prod. of methyl ethyl pyridines						10	K025	
Centrifuge/dist. residues from toluene diisocyanate prod.						1,000	K026	
Spent catalyst from hydrochlorinator reactor in prod. of 1,1,1-trichloroethane						10	K027

Waste from product steam stripper in prod. of 1,1,1-trichloroethane						1	K028	
Column bottoms/heavy ends from prod. of trichloroethylene and perchloroethylene						1	K029	
By-product salts generated in the prod. of MSMA and cacodylic acid						1	K030	
Wastewater treatment sludge from the prod. of chlordane						1	K031	
Wastewater/scrubwater from chlorination of cyclopentadiene in chlordane prod.						10	K032	
Filter solids from filtration of hexachlorocyclopentadiene in chlordane prod.						10	K033	
Wastewater treatment sludges from the prod. of creosote						10	K034	
Still bottoms from toluene reclamation distillation in disulfoton prod.						1	K035	
Wastewater treatment sludges from the prod. of disulfoton						1	K036	
Wastewater from the washing and stripping of phorate production						1	K037	
Filter cake from filtration of diethylphosphorothioic acid in phorate prod.						10	K038	
Wastewater treatment sludge from the prod. of phorate						10	K039	
Wastewater treatment sludge from the prod. of toxaphene						10	K040	
Heavy ends/residues from dist. of tetrachlorobenzene in 2,4,5-T prod.						1	K041	
2,6-Dichlorophenol waste from the prod. of 2,4-D						10	K042	
Wastewater treatment sludge from manuf. and processing of explosives						10	K043	
Spent carbon from treatment of wastewater containing explosives						10	K044	
Wastewater sludge from manuf.,formulating,loading of lead-based initiating compd						10	K045	
Pink/red water from TNT operations						10	K046	
Dissolved air flotation (DAF) float from the petroleum refining industry						10	K047	
Stop oil emulsion solids from the petroleum refining industry						10	K048	
Heat exchanger bundle cleaning sludge from petroleum refining industry						10	K049	
API separator sludge from the petroleum refining industry						10	K050	
Tank bottoms (leaded) from the petroleum refining industry						10	K051	
Ammonia still lime sludge from coking operations						10	K052	
Emission control dust/sludge from primary prod. of steel in electric furnaces						1	K060	
Spent pickle liquor generated by steel finishing (SIC codes 331 and 332)						10	K061	
Acid plant blowdown slurry/sludge from blowdown slurry from primary copper prod.						10	K062	
Surface impoundment solids at primary lead smelting facilities						10	K064	
Sludge from treatment of wastewater/acid plant blowdown from primary zinc prod.						10	K065	
Emission control dust/sludge from secondary lead smelting						10	K066	
Brine purification muds from mercury cell process in chlorine production						10	K069	
Chlorinated hydrocarbon waste from diaphragm cell process in chlorine production						1	K071	
Distillation bottoms from aniline extraction						10	K073	
Wastewater sludges from prod. of veterinary pharm. from arsenic compds.						100	K083	
Distillation or fractionation column bottoms in prod. of chlorobenzenes						1	K084	
Wastes/sludges from prod. of inks from chromium and lead-containing substances						10	K085	
Decanter tank tar sludge from coking operations						10	K086	
Spent polliners from primary aluminum reduction						100	K087	
Emission control dust/sludge from ferrochromium/silicon prod.						10	K088	
Emission control dust/sludge from ferrochromium prod.						10	K090	
Dist. light ends from prod. of phthalic anhydride by ortho-xylene						10	K091	
Dist. bottoms in prod. of phthalic anhydride by ortho-xylene						5,000	K093	
Distillation bottoms in prod. of 1,1,1-trichloroethane						5,000	K094	
Heavy ends from dist. column in prod. of 1,1,1-trichloroethane						100	K095	
Vacuum stripper discharge from the chlordane chlorinator in prod. of chlordane						100	K096	
Untreated process wastewater from the prod. of toxaphene						1	K097	
Untreated wastewater from the prod. of 2,4-D						1	K098	
Waste leaching soln from emission control dust/sludge in secondary lead smelting						10	K099	

NAME	NAMEINDEX	CAS/ 313 Category Codes	DHS STQ (in pounds unless otherwise noted)	Section 302 (EHS) TPO	Section 304 EHS RQ	CERCLA RQ	Section 313 RCRACODE	CAA 112(r) TQ
Dist. tar residue from aniline in prod. of veterinary pharm. from arsenic compd.						10	K100	
Residue from activated carbon in prod. of veterinary pharm. from arsenic compds.						1	K101	
Process residues from aniline extraction from the prod. of aniline						1	K102	
Combined wastewater streams generated from prod. of nitrobenzene/aniline						100	K103	
Aqueous stream from washing in prod. of chlorobenzenes						10	K104	
Wastewater treatment sludge from mercury cell process in chlorine prod.						10	K105	
Column bottoms from separation in prod. of UDMH from carboxylic acid hydrazides						1	K106	
Condensed column overheads and vent gas from prod. of UDMH from -COOH hydrazides						10	K107	
Spent filter cartridges from purif. of UDMH prod. from carboxylic acid hydrazides						10	K108	
Condensed column overheads from separation in UDMH prod. from -COOH hydrazides						10	K109	
Product washwaters from prod. of dinitrotoluene via nitration o toluene						10	K110	
Reaction-by-product water from drying in toluenediamine prod from dinitrotoluene						10	K111	
Condensed liquid light ends from purification of toluenediamin during its prod.						10	K112	
Vicinals from purification of toluenediamine during its prod from dinitrotoluene						10	K113	
Heavy ends from toluenediamine purification during prod. from dinitrotoluene						10	K114	
Organic condensate from solvent recovery system in prod. of toluene diisocyanate						10	K115	
Wastewater from vent gas scrubber in ethylene bromide prod by ethene bromination						10	K116	
Spent absorbent solids in purification of ethylene dibromide in its prod.						1	K117	
Process wastewater from the prod. of ethylenebisdithiocarbamic acid and salts						1	K118	
Reactor vent scrubber water from prod of ethylenebisdithiocarbamic acid and salts						10	K123	
Filtration/other solids from prod. of ethylenebisdithiocarbamic acid and salts						10	K124	
Dust/sweepings from the prod. of ethylenebisdithiocarbamic acid and salts						10	K125	
Wastewater and spent sulfuric acid from the prod. of methyl bromide						10	K126	
Spent absorbent and wastewater solids from the prod. of methyl bromide						100	K131	
Still bottoms from ethylene dibromide purif. in prod. by ethene bromination						1,000	K132	
Process residues from coal tar recovery in coking						1	K136	
Tar storage tank residues from coke prod. from coal or recovery of coke by-prods						1	K141	
Process residues from recovery of light oil in coking						1	K142	
Wastewater residues from light oil refining in coking						1	K143	
Residues from naphthalene collection and recovery from coke by-products						1	K144	
Tar storage tank residues from coal tar refining in coking						1	K145	
Residues from coal tar distillation, including still bottoms, in coking						1	K147	
Distillation bottoms from the prod. of chlorinated toluenes/benzoyl chlorides						1	K148	
Organic residuals from Cl gas and HCl recovery from chlorinated toluene prod.						10	K149	
Wastewater treatment sludge from production of chlorotoluenes/benzoyl chlorides						10	K150	
Organic waste from production of carbamates and carbamoyl oximes						10	K151	
Wastewaters from production of carbamates and carbamoyl oximes (not sludges)						10	K156	
Bag house dusts & filter/separation solids from prod of carbamates, carb oximes						10	K157	
Organics from treatment of thiocarbamate waste						10	K158	
Purif. solids/bag house dust/sweepings from prod of dithiocarbamate acids/salts						10	K159	
Crude oil storage tank sediment from refining operations						1	K161	
Clarified slurry oil tank sediment of in-line filter/separation solids						10	K169	
Spent hydrotreating catalyst						1	K170	
Spent hydrorefining catalyst						1	K171	
Wastewater treatment sludges from the production of ethylene dichloride or vinyl chloride monomer (EDC/VCM)						1	K172	
Wastewater treatment sludges from the production vinyl chloride monomer using mercuric chloride catalyst in an acetylene-based process						1	K174
